Projects:

1. Global Tongues - Full Stack Project: [Live website link](#) | [Client-Site Link](#) | [Server-Site Link](#)
- Have a particular dashboard for students, instructors, and admin. They can manage their activity.
- Admin can manage all student's and instructor's activity and review classes before approval.
- Students can enroll in classes and see all selected and registered courses. Also, it has a payment system.
- Authentication. Responsive, Private Route, Theme Toggle.

Technologies: JavaScript | ReactJS | NodeJS | MongoDB | Express JS | Tailwind CSS | Vercel | Firebase | JWT | Axios | TanStackQuery | React-Router-Dom | AOS | React-Hook-form | Stripe.js.

2. Wedding Wonders - Full Stack Project: [Live Website Link](#) | [Client-Site Link](#) | [Server-Site Link](#)
- A user will be able to create and submit biodata after logging in successfully.
- An admin can approve, delete, and manage a biodata after submitting it by any user.
- A user can find biodata by filtering easily.

Technologies: JavaScript | ReactJS | NodeJS | MongoDB | ExpressJS | Tailwind CSS | Vercel | Firebase | JWT | Axios | TanStackQuery | React-Router-Dom | React-Hook-form.

3. Tot Zone - MERN Stack Project: [Live website link](#) | [Client-Site Link](#) | [Server-Site Link](#)
- Any user can add a Toy, see all of his toys on the My Toys page, and also see all toys added by anyone.
- Anyone just sees all toys and details of a particular toy before login and for more activity needs to log in.
- A user can manage his products properly, update, delete, and add. All routes are private.

Technologies: React Js | Tailwind CSS | Node Js | Express Js | MongoDB | Firebase | React-Hook-Form.
